Downtown Akron**

**Thursday, March 25, 2004  
4:00 p.m. to 9:00 p.m.**

**AIA members can earn at least 3 LU's and  
CSI members can earn at least .3 CEU's!!**

**Featuring:**

- 5 Accredited seminars for AIA and CSI
- 20 booths of NEW products
- Keynote speaker, Jeff Tuckerman from the OSFC
- Panel discussion and forum on the historic 15 year, \$800 million Akron Public Schools Project and its partnership with the City of Akron

This year's Akron-Canton CSI Annual Educational Seminar & New Technology Show focuses on the OSFC. This topic is interesting not only to those involved with the Akron Public Schools project, but to anyone (including manufacturer's reps, product suppliers, and construction related fields) pursuing work under the OSFC guidelines.

Many of the tabletop displays will feature products that are listed in the OSFC guidelines. Manufacturer's reps will be on hand to answer your questions regarding those products, and dinner will be included in the vendor area.

The keynote speaker from the OSFC will be Jeff Tuckerman, who will bring us up to date on what progress is being made with school projects in Ohio, and what opportunities may exist.

After the OSFC session, you will be able to learn and even earn credits in one of five educational sessions that will be presented by Sarnafil, TOTO, the Henry Bierce Company, Stego, and PSI.

Following the educational sessions we are excited to present: "The Other Three R's of Akron Public Schools: Roles, Rules, & Resources" This will be a panel discussion and forum consisting of members from Akron Public Schools, OSFC, the City of Akron, AAG (Architects), and RKPS (CM's). Here is your chance to obtain current information regarding OSFC and the \$800 million construction program for the Akron Public Schools. You will be able to discover the inner workings of how the program will affect each of us in our local construction industry.
